KROHNE Inc. is looking for a

Field Application Engineer- Mid West -US

We are currently looking for a professional to join our dynamic, growing team as a Field Application Engineer - Mid West United States. This person will assist customers and the sales force in the field with troubleshooting and programming on all KROHNE products as it relates to our major accounts

Your main responsibilities:

- Provide customers and sales channels with relevant advice concerning the suitability of KROHNE products for certain applications.
- Assist customers and sales force in the field with troubleshooting and programming on all KROHNE, Inc. products.
- Perform customer training and assist sales force with product presentations.
- Responsible for hiring and training field service providers within region and scheduling field service work in region.
- Responsible for all test and evaluation products within region.
- Maintain communications with all key accounts and key customers within region.
- Available to travel outside of region on occasion to assist KROHNE, Inc as required.
- Provide technical phone support to end customers and sales channels either on scheduled TASC week or not.
- Other duties may be assigned.

Your qualifications:

- Bachelor's degree in engineering or five years of product and/or industry experience. Equivalent combination of education and experience may be accepted.
- Previous application experience with flow and level products
- Previous knowledge of chemicals and their behavior with regard to corrosion & material compatibility
- Proven success working in the capacity of product specialist for flow and level measuring devices OR proven success working as a design engineer for instrumentation in and engineering company
- Excellent computer skills including proficiency in MS Office and ERP/CRM
- Demonstrated ability in successfully working independently and efficiently in order to prioritize and address multiple projects simultaneously
- Valid drivers license and clean driving record
