KROHNE Product Engineer

The Company

KROHNE is a world-leading manufacturer and supplier of solutions in industrial process instrumentation. We employ over 4,000 employees globally across 16 production facilities.

While today being a global supplier for process instrumentation and automation, KROHNE started as a small enterprise a century ago and has advanced from an instrument manufacturer to a provider of industrial measurement products, solutions, and services.

2021 marked the 100th anniversary of KROHNE, and the aim of the new management team is to strengthen the foundation and to set the course for the next 100 years.

KROHNE Ltd. was founded in 1976 and is the Group centre of excellence for Coriolis mass flowmeter technology and conducts all its research and development and manufacturing operations at two modern manufacturing facilities in Wellingborough. In addition, KROHNE Ltd is also responsible for the sales and marketing for the complete KROHNE Group product range to the UK market.

The role

To provide proactive, effective and efficient design, engineering, test requirements and documentation of Special ENquiries (SENQ) received at initial enquiry through to quotation, post order and shipment. The role comprises of international projects for flow measurement requiring effective communication across multiple departments to ensure quotations are successfully risk managed and delivery of customer orders meets agreed specification and delivery expectations.
