KROHNE

 measure the facts

KROHNE is an innovative process instrumentation and measurement solutions company operating in more than 40 countries. Through continuous research and development and a consistent customer orientation, we are one of the leaders in our industry. KROHNE's Marine Division provides measurement instrumentation, services, and solutions for all types of vessels. These range from flow, pressure measurement devices and level gauges for on-board tanks to complete systems for monitoring cargo, fuel consumption and bunker checks. In addition, our engineering team offers extensive experience and knowledge in complete engineering, project management, commissioning, and training.

KROHNE is looking for a

Maritime Compliance Engineer / Specialist

KROHNE Marine is looking for a motivated Maritime Compliance Engineer/Specialist to manage the certification process and ensure products meet global maritime standards. The role involves working with international certification bodies and internal teams to ensure compliance with maritime regulations. In addition, this role requires a proactive approach to navigating complex regulatory environments and a strong ability to communicate and collaborate across multiple departments to achieve compliance excellence.

Your main function:

- Ensure KROHNE Marine products meet global maritime certification standards
- Coordinate and manage the technical certification process
- Collaborate with international certification bodies and class societies
- Liaise daily with internal departments such as R&D, Quality Assurance, and Product Management
- Facilitate timely preparation and submission of technical documentation and product samples
- Provide guidance on product development to ensure compliance with maritime laws and regulations

Your key responsibilities:

- **Certification Management:**
Coordinate with international certification bodies to organise and manage maritime product certifications
- **Regulatory Compliance:**
Monitor maritime legislation and assess its impact on product offerings.
- **Technical Collaboration:**
Serve as the main contact for R&D, ensuring product development aligns with regulatory standards
- **Documentation & Communication:**
Work with internal teams to ensure timely and accurate technical documentation and product samples.
- **Product Development Support:**
Provide regulatory guidance throughout the product lifecycle, from concept to market launch.
