KROHNE

 measure the facts

KROHNE is an innovative process instrumentation and measurement solutions company operating in more than 40 countries. Through continuous research and development and a consistent customer orientation, we are one of the leaders in our industry. KROHNE Inc. headquartered in Beverly, MA covers the United States, Canada, Mexico, and the Caribbean regions through a vast network of direct sales personnel and representative partners.

KROHNE Inc. is looking for a **Quality Engineer - Beverly, MA**

We are currently looking for a person to join us in **Quality** at our Beverly location. This person will leverage their technical expertise and knowledge of quality assurance to help drive continuous improvement in a collaborative environment which foster team growth.

ESSENTIAL DUTIES AND RESPONSIBILITIES include the following. Other duties may be assigned.

- Collaborate with department managers as needed to provide technical support for quality-related issues, conduct detailed root cause analysis, and implement effective solutions.
- Represent Quality when working cross functionally with manufacturing engineers, production teams, other departments, and senior management to implement best practices, participate in procedure updates, and ensure quality standards are being followed.
- Creating CMM programs ensuring they run properly and provide accurate reports. Providing guidance and mentorship to the Quality Technician as it relates to running programs and learning the system.
- Participate in addressing noncompliance and nonconformance issues, writing nonconformance reports and performing root cause analysis. Where possible implementing corrective actions or proposing corrective actions to department heads. Ensure corrective actions are implemented effectively. Contribute in monthly MRB meetings and FAI reviews.
- Enter and monitor customer complaints, assist with documenting the problem and ensuring the customers needs have been met. Work with Sales and Service when to customer equipment needs to be returned and/or a replacement needs to be ordered.
- Work with Quality Technician and Manufacturing Engineers to create inspection plans for incoming material.
- Stay current with new inspection technologies and techniques and recommend improvements to the inspection process.
- Assist in overseeing supplier quality management, working with suppliers when corrective actions need to be taken and ensuring their compliance to regulatory requirements.
- Support calibration process, running reports and preparing items to be calibrated either internally or by a third-party. Update calibration records ensuring compliance and accuracy.
- Schedule and participate in internal and third-party audits as necessary. Audits include PED/ATEX/3A and ISO 9001. Review reports, generate corrective actions and follow through with implementation.
